GroundSure Planning- Providing the most accurate planning data in the market

September 2008

Whilst various planning searches are available, only GroundSure includes the superior Glenigan planning data in our planning reports. Glenigan holds the definitive register of UK planning applications, providing the most comprehensive, reliable and up-to-date data available.

GroundSure is committed to providing the most accurate data available with regards to planning applications and decisions, but still remaining the most cost effective solution in the market.

The RRP for the GroundSure Planning is £17.02 excl. VAT if purchased with a GroundSure Homebuyers residential environmental report.

Glenigan achieves this data quality by collecting details of planning applications and decisions from all 456 Local Authorities across the UK, researched by an in-house team of over 100 web and phone desk researchers. Testament to Glenigan's data quality are the thousands of companies that use the data on a daily basis and the contracts Glenigan has won to supply data to two central government agencies, the Planning Portal and Ordnance Survey. The Planning Portal is the Government gateway to planning information throughout the UK and Ordnance Survey is Great Britain's national mapping agency, providing the most accurate and up-to-date geographic data.

GroundSure Planning includes all planning applications to 500m for the last 10 years, GroundSure's unique mobile mast data, school results, points of local interest, local amenities, local infrastructure and much more.

Only GroundSure delivers this depth and breadth of data, providing the essential information vital to making an informed decision before buying a property.

Not all reports are the same- ask for GroundSure by name.
