OS VECTORMAP

District

When you need a versatile, customisable backdrop map on which to pinpoint particular locations, show boundaries and shaded-in areas, OS VectorMap District is for you.

OS VectorMap® District is a contextual or backdrop map data product that can be customised by selecting and styling geographic features to deliver the best presentation for your own data and location information.

Ideal for creating web applications, OS VectorMap District contains only the most important information, giving you a clear, uncluttered backdrop map.

Show enough detail to give the lie of the land while avoiding overwhelming detail. OS VectorMap District lets you display just the map layers you need.
